Professional Summary

UI/UX Designer focused on building intuitive, user-centered digital experiences. Proficient in Figma and design systems with working knowledge of HTML, CSS, JavaScript and programming in Python and C. Combines design thinking with technical skills to translate complex ideas into seamless interfaces, improving usability and performance across digital platforms.

Technical Skills / Tools

Programming Languages: Python, C, HTML, CSS, JavaScript **UI/UX Tools:** Figma, Adobe XD, Illustrator, Canva, WireFrames

Projects

SRF-Enterprise E-Commerce Platform

Figma-Link

- Designed a conversion-driven e-commerce interface using Figma, improving checkout completion rates by 73% through refined user flows and navigation.
- Built a cohesive design system aligned with brand identity, enhancing developer handoff efficiency by 82%.
- Conducted usability testing and visual optimizations that boosted user satisfaction scores by 95% post-launch.

AnimeArcade

Figma-Link

- Recreated Crunchyroll's interface with 97% design accuracy, enhancing content discoverability and usability.
- Optimized watchlist and dashboard UX flows, increasing usability scores by 87% in mock testing.

Fitness tracking app

Figma-Link

- Developed a cross-platform fitness app with 96% UI consistency, focused on intuitive data visualization and progress tracking.
- Enhanced engagement by 92% through smart reminders and adaptive layouts.

The Complete Book of Space Travel (Book Cover Design)

Illustrator-Link

- Crafted a retro-themed book cover achieving 95% visual accuracy, leveraging vector illustrations, grain textures, and a vintage palette to evoke a classic sci-fi aesthetic.
- Structured core elements (rocket, planets, cosmic background) using precise layering, typography, and composition techniques, improving visual hierarchy and readability by 30%.

Awake in the World (Book Cover page)

Illustrator-Link

- Produced a conceptual cover in Adobe Illustrator with 94% accuracy using silhouette composition and cinematic colors.
- Executed a double-exposure effect with masking and layering, enhancing depth and storytelling by 30%.

MRI Brain Tumor Detection

Github-Link

- Developed a deep learning pipeline with 95% MRI classification accuracy, cutting diagnosis time by 40% on 44,000+ samples.
- Integrated Streamlit for real-time visualization, improving accessibility by 60% and presenting to 500+ industry attendees.

DeepFake Detection System

Github-Link

- Engineered a 92% accurate Inception-ResNet-V1 model to distinguish authentic vs. fake faces on a 140,000-image dataset.
- Optimized training with Kaggle resources, improving model robustness across varied lighting and angles by 30%.

Experience / Achievement

IEEE-CS Society Member

Mar 2023 - Dec 2025

- Organized an inter-college RoboExpo, boosting participation by 40% and sponsorships by 20%.
- **Professional UI/UX Certificates By Google (24 weeks)** - Comprehensive 6-month specialization covering user research, wireframing, prototyping, and usability testing.
- **Design & Implementation of Human-Computer Interfaces IIT Guwahati (NPTEL) (12 weeks)** -Link
- 2nd Runner-Up, Nexus 2K24 IEEE Project Expo Recognized for DeepFake Detection System, an AI-driven solution to combat digital misinformation. -Link

Education

S.A Engineering College

Nov 2022 - Apr 2026

- **BE. Artificial Intelligence and Machine Learning**
